Description of fiscal impact

HB 953 allows, but does not require, the Department of Public Health and Human Services to have Direct Primary Care contracts under the Medicaid program and would only be implemented if the legislature appropriated the funds. There would be costs associated with implementing the program and administering an associated 1115 waiver. Medicaid benefits would be cost neutral.

FISCAL ANALYSIS

Assumptions

Department of Public Health and Human Services (department)

1. The department assumes that the implementation of Direct Primary Care (DPC) contracts will require an 1115 waiver through the Centers for Medicare & Medicaid Services (CMS). To meet federal and state public notice requirements and timelines, the department will submit the waiver to be approved by October 1, 2025, so that implementation can take effect on January 1, 2026.
2. The 1115 waiver is a five-year, multi-step approval process from CMS.
3. Based off past workload to implement and monitor current waivers, the department estimates an additional 0.50 FTE would be required to compile data, completing quarterly reporting and complete close out requirements. It is estimated that the cost of the FTE would be \$35,614 in FY 2026, \$36,148 in FY 2027, \$36,261 in FY 2028, and \$36,148 in FY 2029.
4. There is a one-time cost of \$2,700 for office set up and indirect costs are 3% of personal services.
5. The above costs are Medicaid administrative services that receive Federal Medical Assistance Percentage (FMAP) of 50% general fund and 50% federal funds for personal services.
6. The department estimates contract costs of \$205,000 for the CMS-required independent evaluations of the

1115 waiver and will be expensed over 4 years. Contact costs receive FMAP of 50% for general fund and 50% federal funds.

7. Direct Primary Care (DPC) would be budget neutral since the program does not involve adding new services, nor a new provider type. Services being rendered in a DPC facility are services currently provided by Medicaid enrolled providers. The method of payment for DPC would be different, however, the rate would be set as budget equivalent to current services and primary care case management (PCCM) payments. The department would expect to see a shift of funds, but no additional expenses.
8. Changes to the Medicaid Management Information System (MMIS) legacy systems including data and reporting to reflect necessary changes would be one-time \$54,800 (\$137/hour for 400 hours) with an FMAP of 10% general fund and 90% federal funding.

Technical Concerns

Department of Public Health and Human Services

1. If the department implements a DPC program, it may limit its ability to collect preventive core measure information for CMS reporting as there would not be detailed service level claims information.
2. The department would need to consider putting in the contract they must submit encounter claims.
3. The DPC providers would need to enroll as ordering, referring, or prescribing providers for Medicaid to reimburse for any services that these providers order, prescribe or refer. (42 CFR 455.410).
