value as set by administrative rule. The values set by administrative rule must be updated annually every 3 years and address the general geographic proximity to available housing and may consider other reasonable factors that affect value.

(2) The term "wages" does not include any of the following:

(a) employee expense reimbursements or allowances for meals, lodging, travel, subsistence, and other expenses, as set forth in department rules;

(b) the amount of the payment made by the employer for employees, if the payment was made for:

(i) retirement or pension pursuant to a qualified plan as defined under the provisions of the Internal Revenue Code;

(ii) sickness or accident disability under a workers' compensation policy;

(iii) medical or hospitalization expenses in connection with sickness or accident disability, including health insurance for the employee or the employee's immediate family;

(iv) death, including life insurance for the employee or the employee's immediate family;

(c) vacation or sick leave benefits accrued but not paid;

(d) special monetary rewards for individual invention or discovery; or

(e) monetary and other benefits paid to a person as part of public assistance, as defined in 53-4-201.

(3) (a) Except as provided in subsection (3)(b), for compensation benefit purposes, the average actual earnings for the four pay periods immediately preceding the injury are the employee's wages, except that if the term of employment for the same employer is less than four pay periods, the employee's wages are the hourly rate times the number of hours in a week for which the employee was hired to work.

(b) For good cause shown, if the use of the last four pay periods does not accurately reflect the claimant's employment history with the employer, the wage may be calculated by dividing the total earnings for an additional period of time, not to exceed 1 year prior to the date of injury, by the number of weeks in that period, including periods of idleness or seasonal fluctuations.

1 subsection, "concurrent employment" means employment in which the employee was actually employed at the
2 time of the injury and would have continued to be employed without a break in the term of employment if not for
3 the injury.

4 (b) Except as provided in 39-71-118(10)(c), the compensation benefits for a covered volunteer
5 must be based on the average actual monetary wages in the volunteer's regular employment, except self-
6 employment as a sole proprietor or partner who elected not to be covered, from which the volunteer is disabled
7 by the injury incurred.

8 (c) The compensation benefits for an employee working at two or more concurrent remunerated
9 employments must be based on the aggregate of average actual monetary wages of all employments, except
10 for the wages earned by individuals while engaged in the employments outlined in 39-71-401(3)(a) who elected
11 not to be covered, from which the employee is disabled by the injury incurred.

12 (5) For the purposes of calculating compensation benefits for an employee working for an
13 employer, as provided in 39-71-117(1)(d), and for calculating premiums to be paid by that employer, the wages
14 must be based upon all hours worked multiplied by the mean hourly wage by area, as published by the
15 department in the edition of Montana Informational Wage Rates by Occupation, adopted annually by the
16 department, that is in effect as of the date of injury or for the period in which the premium is due."
