Description of fiscal impact

HB 689 requires hospitals to make available to the public a list of standard charges for each of at least 300 services provided specific to the hospital location. The Department of Public Health and Human Services is responsible for ensuring that hospitals comply with the document publishing and formatting requirements, publishing the daily rate for each of its healthcare facilities, and reporting by September 1 each year to the Children, Families, Health, and Human Services interim committee.

FISCAL ANALYSIS

Assumptions

1. The Department of Public Health and Human Services (DPHHS) calculates a daily rate for each of its healthcare facilities, which could be published. The fee the patient is responsible for paying is determined by their ability to pay. DPHHS can comply with all requirements of HB 689 with existing resources.
