General Fund Balance				

Description of fiscal impact

HB 90 provides that all real property is valued on a two-year reappraisal cycle except for railroads, which will remain under annual assessment.

FISCAL ANALYSIS

Assumptions

1. The vast majority of property is currently assessed on a biennial schedule..
2. This bill moves all locally assessed real property in all classes to assessment every two-years.
3. Centrally assessed property is currently on a two-year reappraisal schedule, however approximately half of this property is revalued in the first year of the cycle and the other half, the next year.
4. There may be initial timing impacts for certain class 5 (rural co-op and pollution control property), class 7 (locally assessed utilities) and class 17 (qualified data centers) real property. These classes of property represent less than 1.5% of all statewide taxable value.
5. There are no additional administrative costs needed to implement the proposed changes.
